DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings are informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Rummel et al, US 3,799,149 A ("Rummel").

Claims 1-34: Rummel teaches a respiratory gas exchange monitor and method of determining a respiratory quotient (see Abstract), comprising: a mouthpiece 196; inspiration spirometer 18 and expiration spirometer 20 for determining volume of inhaled and exhaled gases; mass spectrometer for simultaneously determining a mass or concentration of oxygen, carbon dioxide, and/or nitrogen (see col. 2, ll. 22-50) in the
